South China: A rising power in science

(A *Science*/AAAS Custom Publishing Office feature)

Not only does Southern China want to be an export powerhouse—it also wants to be a stronghold for science. And with initiatives in space science, high energy physics, and genomics, it is geared up to do so. [Whole Story](#)

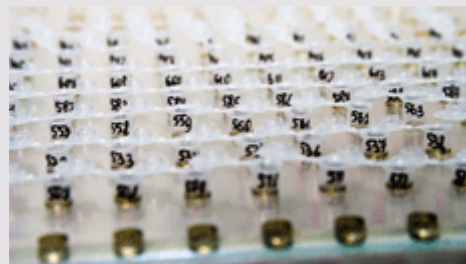

The need for speed in today's job search environment

These tips will help you keep pace with fast-moving employers. [Whole Story](#)

Many postdocs face challenges securing parental leave, new report highlights

Navigating leave policies can be tricky, so postdocs need to be proactive and investigate all their resources. [Whole Story](#)

A novel look at graduate school

A fictional scientist's struggles reveal much that is real about being a doctoral student.
