

Connect with your audience through our *Science* — branded websites.

Science accepts a wide variety of IAB display ad units so that you can effectively reach your prospects and customers while at work or on the go. Our responsive design means your banners will be viewed in the framework of the users' device (desktop or mobile) for a more engaging experience. Talk with your *Science* sales manager to explore ROS and targeted options that connect with and engage our viewers.

Our website update has a variety of positions available:

Inline banners sit within content blocks of non-research articles on the site. Our **"Sticky" Rectangle** sits in the right sidebar, and once seen, stays in view as the reader scrolls to the bottom of the page. These positions are in addition to our high-impact **Anchor** and **Billboard** banners, as well as the usual **Leaderboard**, **Rectangle**, and **Tower** banner positions.

BANNER TARGETING

Geographic: specific countries, regions, or even cities.

Contextual: banner appears on relevant pages that include content based on keywords determined by the client.

Behavioral: banner appears in front of users who have recently engaged with multiple pages of subject-specific content.

Journal or specific page: banner appears on a certain journal page, site section, or multiple journal pages:

Journals

- *Science*
- *Science Advances*
- *Science Immunology*
- *Science Robotics*
- *Science Signaling*
- *Science Translational Medicine*

Site Sections

- *Science Home*
- *Science Careers*
- *News from Science*
